Career Objective

Motivated and enthusiastic Computer Science Engineering graduate, seeking an opportunity to leverage technical and communication skills in a professional environment. Strong problem-solving ability, keen interest in development and analysis, and a passion for continuous learning.

Education

Bachelor of Engineering in Computer Science and Engineering

Anuradha College of Engineering and Technology, Chikhli

HSC

Percentage: 84%

SSC

Percentage: 79%

Academic Projects

1. Online E-Book Store – One More Page

- Developed a web-based platform allowing users to browse, search, and purchase e-books across various genres.

- Key Features: User registration, book search by genre/author, secure checkout, and download access.

- Technologies Used: HTML, CSS, JavaScript, PHP, MySQL

- Role: Designed front-end interface and implemented backend database queries for book and user data management.

2. Travel Guide – travelX

- Designed a travel information system that provides details about destinations, itineraries, accommodations, and weather.

- Key Features: Destination search, itinerary suggestions, weather info, hotel and travel tips.

- Technologies Used: HTML, Bootstrap, JavaScript, PHP, API integration for weather and maps.

- Role: Handled UI/UX design and implemented logic for dynamic content display.

3. Resume IQ – An AI Resume Analyzer

- Built an intelligent system using NLP techniques to analyze resumes and provide insights, feedback, and improvement suggestions.

- Key Features: Automated keyword detection, formatting suggestions, and job fit analysis.

- Technologies Used: Python, Natural Language Processing (spaCy), Tkinter GUI

- Role: Developed the NLP logic and integrated the GUI for user-friendly interactions

Technical Skills

- Programming Languages: C, C++, Java, Python
 - Web Technologies: HTML, CSS, JavaScript
 - Database Systems: MySQL
 - Tools & Platforms: Git, GitHub, VS Code
 - AI/ML: Python Libraries
 - Operating Systems: Windows
 - Others: Basic knowledge of REST APIs, UI/UX Design Principles
-

Strengths

- Excellent communication and presentation skills
 - Quick learner with a keen interest in new technologies
 - Hardworking and dependable
-

Hobbies & Interests

Reading books, sports and fitness, music, cooking
